WORK EXPERIENCE

RAKUTEN KOBO INC., Toronto, ON

2021 – January 2026

Production Specialist (Innovation Team)

- Selected for a newly formed innovation team focused on process improvement and internal tool development for email production workflows.
- Led the ongoing enhancement, rollout, and adoption of an email automation tool developed to improve production workflows, while continuing to support high-volume CRM campaign deployment and troubleshooting.

Production Coordinator, 2021 – 2025

- Executed CRM email and digital marketing campaigns for eBook, audiobook, and device releases across multiple languages and time zones from production intake through deployment under tight production timelines.
- Identified an opportunity to streamline manual email production workflows and independently developed an automation tool that reduced weekly email production time by approximately 50 percent, improved accuracy by minimizing manual coding errors, and decreased reliance on external development resources.
- Delivered email campaigns reaching more than 400,000 customers.
- Built customized audience segmentation rules and targeting logic based on campaign requirements to support targeted campaigns and customer engagement.
- Executed A/B tests across subject lines, content, layout, and send timing to support campaign optimization and performance analysis.
- Performed QA testing to verify correct rendering, functionality, and content accuracy across major email clients, including Gmail and Outlook, before deployment.
- Troubleshoot and resolved HTML, CSS, rendering, and performance issues to ensure successful deployment of up to 15 international campaigns per week.
- Developed, modified, and deployed reusable HTML email templates and website banner assets in accordance with brand standards and technical requirements.

Production Coordinator (continued)

- Translated Figma designs into clean, production-ready HTML and CSS.
- Managed revisions and updates in collaboration with multiple internal stakeholders.

CCS CREATIVE, Toronto, ON**February – May 2021****Web Developer**

- Maintained and updated hospitality and entertainment websites, including modifying menu items, updating prices, and ensuring content accuracy.
- Converted creative designs into HTML email assets and supported scheduled deployments.
- Produced and modified HTML and CSS for integration into existing websites.
- Verified correct display and functionality across common devices and screen sizes.
- Reviewed content and assets for accuracy, quality, and completeness before upload or deployment.

SUN LIFE FINANCIAL, Toronto, ON**2012 – 2017****Campaign Administrator**

- Executed lead assignment processes for employees transferring employee health benefits, Group RRSPs, and related financial accounts, delivering accurate and timely opportunities to financial consultants.
- Reviewed and verified client bank transfer forms for Group RRSP and related financial account transfers against established eligibility criteria.
- Created leads for financial consultants when eligibility requirements were met following form verification.
- Supported business reporting by compiling and delivering accurate campaign and operational data.
- Performed business and user acceptance testing in Siebel and other internal applications to support campaign enhancements.
- Developed, documented, and maintained campaign processes to ensure operational consistency and continuity.

IPSOS REID, Toronto, ON**2011 – 2012****Transcription Specialist**

- Provided accurate transcription services for qualitative focus group sessions on everyday consumer products.
- Ensured clarity, completeness, and adherence to project guidelines and timelines.

CREATIVE HOUSE, Toronto, ON**2007 – 2010****Project Manager**

- Created and executed work plans for digital and marketing projects, primarily for Research in Motion, including device and software release emails, event materials, and microsites.
- Completed minor design and HTML/CSS updates for internal and user-facing websites.
- Collaborated with designers to implement clean interfaces and intuitive user experiences.
- Conducted QA testing to identify errors and improve usability before launch.
